Documented moves relevant to this set

Mailchimp:

Mailchimp’s Free marketing plan tightened to 250 contacts and 500 monthly sends, effective 17 Feb 2026 after a mid-January support/community heads-up. Live pricing page now leans hard on “Under 250 contacts? It’s free.” — a classic freemium gate raise that pushes early-stage senders onto Essentials/Standard sooner.

Impact: High for bootstrapped newsletters and side projects still on Free. Competitor battlecards should refresh Brevo/MailerLite/Kit Free comparisons this week.

Linear: Basic $8→$10, Business $14→$16; legacy Plus/Standard retiring

Live pricing extract on 2 Nov 2026 shows Basic at $10 and Business-tier signals at $16 — matching the late-2025 list-price uplift. Separately, Linear is migrating all workspaces off legacy Plus/Standard onto Basic/Business/Enterprise at the next renewal after 1 Feb 2026.

Impact: Medium–High for eng-tool buyers and anyone still on grandfathered Plus/Standard. Expect renewal sticker shock and feature-gap questions (SAML, triage, private teams).
